

Lipofirm PATCH

Lipofirm Patch is a natural aid for slimming with instant results for homecare. An effective gel infused patch is placed directly onto the targeted area of concern. The Lipofirm patch works by providing transdermal delivery of natural active ingredients through the skin pores directly to the fat cells and absorbing the toxins from the body.

Lipofirm Patch works on the lymphatic system by increasing a calorific burn and metabolism within the body producing a natural process of inch loss, cellulite reduction and detoxification.

Lipofirm Patch can be used on all parts of the body that have uneven fatty tissue that does not respond to diet or exercise. The patch leaves the body slimmer, toned and feeling healthier in a short period of time.
